remove this : its only MT5

Your analysis was never the issue.

Emotional control

Revenge trades. Moved stop-losses. Cutting a winner early because it felt risky, or holding a loser too long because it felt personal. AURUM has no emotional stake in the trade — it follows the rule you set, on the trade you would have hesitated on and the one you would have overridden.

Screen time

You don't need to watch charts all day to catch a setup. AURUM monitors continuously and executes within your rules while you're at work, asleep, or simply not looking — no missed entries because you were in a meeting.

Consistency

The same risk rule, applied the same way, on every single trade — not just the ones where you happened to feel disciplined that day.

There is no proper alignment here and design is not up to mark

Built on 3 Core Principles

AURUM is designed to solve what manual trading can't — helping you trade with discipline, precision, and confidence.

Emotional Control

Emotions are the #1 reason traders lose. AURUM removes fear, greed, and hesitation from the equation by executing trades based on rules, not feelings. Stay disciplined and consistent — every single time.

Trade with logic.
Not with emotions.

Save Time

Markets move 24/7. You can't watch charts all day. AURUM monitors the market, identifies high-probability opportunities, and executes trades for you — so you can focus on what matters most.

More time for life.
Less screen time.

Consistency

Success in trading comes from repetition and consistency. AURUM follows your strategy without deviation, helping you stay on track and build long-term, steady performance.

Same strategy.
Same discipline. Every time.

Three Principles. One Goal – Consistent Growth.

this just a normal AI generated design pls take a inspiration from here & also i have changed some wording use this here

Note: On all the session try to improve the design and alignment please

current design : dont seem more appealing please use some good designs and alignment and visualy more appealing

HOW IT WORKSRESULTSABOUTPRICINGFAQ

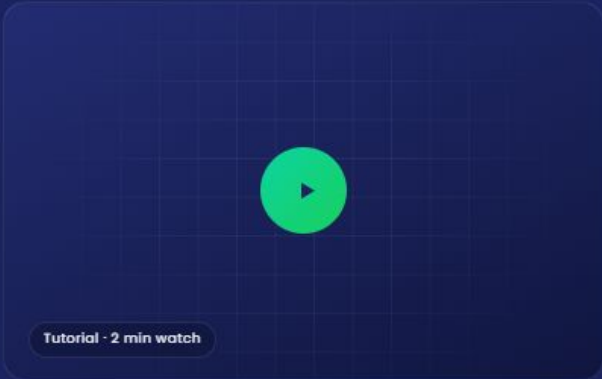

Get Started

THE METHOD

How AURUM makes you a Rule based trader.

No indicators to babysit, no charts to stare at. Here's exactly what happens behind the scenes on every account.

- 01 Reads real volatility — not indicators : ATR-based grid adapts to Gold's actual movement. Tight market = tight grid. Volatile market = wider spacing. Always in sync.
- 02 Enters faster than any human ever could : Millisecond execution, 24 hours a day. It catches the London open at 3am while you're asleep. Every time.
- 03 Protects capital before chasing profit : Stop loss is baked into every position. Not optional. Not movable in a panic. Hard-coded discipline.
- 04 Re-enters when the trend continues : Smart re-entry captures the legs of moves emotional traders close too early. Let it run.

Tutorial - 2 min watch

Revised one, take it as an example. This is again an AI-generated one, which looks far better than the design u provided to us where things looks more organized way

THE METHOD

How AURUM makes you a Rule-Based Trader

No indicators to babysit. No charts to stare at. Here's **exactly** what happens behind the scenes on every account.

- 

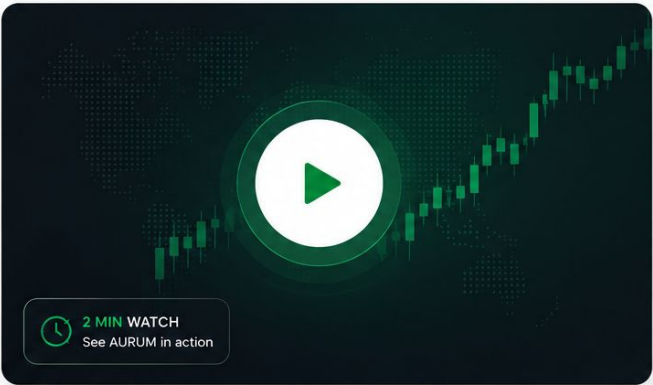

01 Reads real volatility — not indicators
ATR-based grid adapts to Gold's actual movement. Tight market = tight grid. Volatile market = wider spacing. **Always in sync.**
- 

02 Enters faster than any human ever could
Millisecond execution, 24 hours a day. It catches the London open at 3am while you're asleep. **Every time.**
- 

03 Protects capital before chasing profit
Stop loss is baked into every position. Not optional. Not movable in a panic. **Hard-coded discipline.**
- 

04 Re-enters when the trend continues
Smart re-entry captures the legs of moves emotional traders close too early. **Let it run.**

 **AURUM removes emotions. It follows rules. So you don't have to.**

WHAT YOU GET WITH AURUM

- 

Rule-Based Execution
Every trade is executed based on predefined rules — not emotions.
- 

24/7 Monitoring
Markets never sleep. AURUM never misses an opportunity.
- 

Built-in Risk Protection
Capital protection is first. Growth follows with consistency.
- 

Designed for Consistency
Small, repeatable advantages build long-term results.

 No guesswork. No emotional decisions. Just a system that works. | Trade with discipline. Trade with **AURUM**.

One payment. Trade forever.
